Subject index

Acetonitrile,
electrochemistry in near-critical and supercritical fluids. Part 8. Methyl viologen, decamethylferrocene, $Os(bpy)_3^{2+}$ and ferrocene in ——— and the effect of pressure on diffusion coefficients under supercritical conditions (Cabrera, Bard) 147
Use of Nafion coatings on glassy carbon electrodes as localized sources of protons for electrogenerated radical anions in ——— (Mubarak, Peters) 283
Amperometric glucose sensor,
kinetics of an ——— with a soluble mediator (Yokoyama et al.) 107
Array electrodes,
direct demonstration of the propagation theory of a conductive zone in a polypyrrole film by observing temporal and spatial variations of potentials at addressable microband ——— (Tezuka, Aoki) 161

Bismuth,
elucidation of electrochemical mechanisms by impedance spectrometry. Part II. Chemisorption and partial charge transfer in the Bi(Hg)/Bi(III) reaction in the presence of chloride ions (Salié) 31
Bromine,
current-doubling, chemical etching and the mechanism of two-electron reduction reactions at GaAs. Part 1. Experimental results for H_2O_2 and ——— (Minks et al.) 119

Cadmium,
metal voltammetry at dioleoyl lecithin (di-O-PC) coated mercury electrodes: ———, Cu, Eu, Pb, V and Zn and the effect of electrolyte composition (Nelson, Van Leeuwen) 183
Metal voltammetry at dioleoyl lecithin (di-O-PC) coated mercury electrodes: effect of organic complexing agents on ——— voltammetry (Nelson, Van Leeuwen) 201
Cadmium selenide,
a re-examination of the mechanism of electrodeposition of CdX and ZnX (X = Se, Te) semiconductors by the cyclic photovoltammetric technique (Mishra, Rajeshwar) 169
Cadmium telluride,
a re-examination of the mechanism of electrodeposition of CdX and ZnX (X = Se, Te) semiconductors by the cyclic photovoltammetric technique (Mishra, Rajeshwar) 169
Catalytic reactions,
linear sweep voltammetry at tubular electrodes. Part IV. ——— (Dutt et al.) 69
Charge transfer salts,
probing electrocrystallization of ——— with the quartz crystal microbalance (Ward) 79
Chemical etching,
current-doubling, ——— and the mechanism of two-electron reduction reactions at GaAs. Part 1. Experimental results for H_2O_2 and Br_2 (Minks et al.) 119
Current-doubling, ——— and the mechanism of two-electron reduction reactions at GaAs. Part 2. A unified model (Minks et al.) 133
Chemisorbed intermediates,
elucidation of electrochemical mechanisms by impedance spectrometry. Part I. Simultaneous simulation of a set of spectra (SSSS) applied to reactions with ——— (Salié) 1
Chloride ions,
elucidation of electrochemical mechanisms by impedance spectrometry. Part II. Chemisorption and partial charge transfer in the Bi(Hg)/Bi(III) reaction in the presence of ——— (Salié) 31
Cobalt ion,
the electrode processes of selenocyanate complexes of Fe(II) and ——— on mercury electrodes (Winkler, Krogulec) 257
Complexing agents,
metal voltammetry at dioleoyl lecithin (di-O-

PC) coated mercury electrodes: effect of organic ——— on Cd voltammetry (Nelson, Van Leeuwen) 201
Conductive zone,
direct demonstration of the propagation theory of a ——— in a polypyrrole film by observing temporal and spatial variations of potentials at addressable microband array electrodes (Tezuka, Aoki) 161
Copper,
metal voltammetry at dioleoyl lecithin (di-O-PC) coated mercury electrodes: Cd, ———, Eu, Pb, V and Zn and the effect of electrolyte composition (Nelson, Van Leeuwen) 183
Current doubling,
———, chemical etching and the mechanism of two-electron reduction reactions at GaAs. Part 1. Experimental results for H_2O_2 and Br_2 (Minks et al.) 119
———, chemical etching and the mechanism of two-electron reduction reactions at GaAs. Part 2. A unified model (Minks et al.) 133
Cyclic photovoltammetry,
a re-examination of the mechanism of electrodeposition of CdX and ZnX (X = Se, Te) semiconductors by the cyclic photovoltammetric technique (Mishra, Rajeshwar) 169

Decamethylferrocene,
electrochemistry in near-critical and supercritical fluids. Part 8. Methyl viologen, ———, $Os(bpy)_3^{2+}$ and ferrocene in acetonitrile and the effect of pressure on diffusion coefficients under supercritical conditions (Cabrera, Bard) 147
Deuterium oxide,
local heat effects by electrolysis of heavy water (Ratkje, Hafskjold) 269
Diffusion coefficients,
electrochemistry in near-critical and supercritical fluids. Part 8. Methyl viologen, decamethylferrocene, $Os(bpy)_3^{2+}$ and ferrocene in acetonitrile and the effect of pressure on ——— under supercritical conditions (Cabrera, Bard) 147
Diffusion potential,
transport numbers in PVC based membranes from ——— measurements (Armstrong et al.) 209
Dioleoyl lecithin,
metal voltammetry at ——— (di-O-PC) coated mercury electrodes: Cd, Cu, Eu, Pb, V and Zn and the effect of electrolyte composition (Nelson, Van Leeuwen) 183
Metal voltammetry at ——— (di-O-PC) coated mercury electrodes: effect of organic complexing agents on Cd voltammetry (Nelson, Van Leeuwen) 201
Double layer,
electron and molecular effects in the ——— for the metal/electrolyte solution interface (Partenskii, Feldman) 57

Electrochemical impedances,
an iterative least squares method for the identification of ——— (Milocco) 243
Electrochemical mechanisms,
elucidation of ——— by impedance spectrometry. Part I. Simultaneous simulation of a set of spectra (SSSS) applied to reactions with chemisorbed intermediates (Salié) 1
Elucidation of ——— by impedance spectrometry. Part II. Chemisorption and partial charge transfer in the Bi(Hg)/Bi(III) reaction in the presence of chloride ions (Salié) 31
Electrocrystallization,
probing ——— of charge transfer salts with the quartz crystal microbalance (Ward) 79
Electrodeposition,
a re-examination of the mechanism of ——— of CdX and ZnX (X = Se, Te) semiconductors by the cyclic photovoltammetric technique (Mishra, Rajeshwar) 169
Electrolysis,
local heat effects by ——— of heavy water (Ratkje, Hafskjold) 269
Electron effects,
——— and molecular effects in the double layer for the metal/electrolyte solution interface (Partenskii, Feldman) 57
Europium,
metal voltammetry at dioleoyl lecithin (di-O-PC) coated mercury electrodes: Cd, Cu, ———, Pb, V and Zn and the effect of electrolyte composition (Nelson, Van Leeuwen) 183

Ferrocene,
electrochemistry in near-critical and supercritical fluids. Part 8. Methyl viologen, decamethylferrocene, $Os(bpy)_3^{2+}$ and ——— in acetonitrile and the effect of pressure on diffusion coefficients under supercritical conditions (Cabrera, Bard) 147

Gallium arsenide,
current-doubling, chemical etching and the mechanism of two-electron reduction reactions at ———. Part 1. Experimental results for H_2O_2 and Br_2 (Minks et al.) 119
Current-doubling, chemical etching and the mechanism of two-electron reduction reactions at ———. Part 2. A unified model (Minks et al.) 133
Glassy carbon electrodes,
use of Nafion coatings on ——— as localized sources of protons for electrogenerated radical anions in acetonitrile (Mubarak, Peters) 283
Glucose sensor,
kinetics of an amperometric ——— with a soluble mediator (Yokoyama et al.) 107

Heat effects,
local ——— by electrolysis of heavy water (Ratkje, Hafskjold) 269
Heavy water,
local heat effects by electrolysis of ——— (Ratkje, Hafskjold) 269
Hydrogen peroxide,
current-doubling, chemical etching and the mechanism of two-electron reduction reactions at GaAs. Part 1. Experimental results for ——— and Br_2 (Minks et al.) 119

Impedance spectrometry,
elucidation of electrochemical mechanisms by ———. Part I. Simultaneous simulation of a set of spectra (SSSS) applied to reactions with chemisorbed intermediates (Salié) 1
Elucidation of electrochemical mechanisms by ———. Part II. Chemisorption and partial charge transfer in the Bi(Hg)/Bi(III) reaction in the presence of chloride ions (Salié) 31
Ion-exchange membrane,
surface morphology and reactivity of the Pt-SPE electrode. SEM, STM and electrochemical characterization (Uosaki et al.) 275
Iron ion,
the electrode processes of selenocyanate complexes of ——— and Co(II) on mercury electrodes (Winkler, Krogulec) 257
Iterative least squares method,
an ——— for the identification of electrochemical impedances (Milocco) 243

Lead,
metal voltammetry at dioleoyl lecithin (di-O-PC) coated mercury electrodes: Cd, Cu, Eu, ———, V and Zn and the effect of electrolyte composition (Nelson, Van Leeuwen) 183
Least squares method,
an iterative ——— for the identification of electrochemical impedances (Milocco) 243
Linear sweep voltammetry,
———at tubular electrodes. Part IV. Catalytic reactions (Dutt et al.) 69
Lithium chloride,
voltammetric behaviour of a Pt electrode in concentrated aqueous solutions of ——— (Tanaka, Tamamushi) 265

Mercury electrodes,
metal voltammetry at dioleoyl lecithin (di-O-PC) coated ———: Cd, Cu, Eu, Pb, V and Zn and the effect of electrolyte composition (Nelson, Van Leeuwen) 183
Metal voltammetry at dioleoyl lecithin (di-O-PC) coated ———: effect of organic complexing agents on Cd voltammetry (Nelson, Van Leeuwen) 201
The electrode processes of selenocyanate complexes of Fe(II) and Co(II) on ——— (Winkler, Krogulec) 257
Metal/electrolyte solution interface,
electron and molecular effects in the double layer for the ——— (Partenskii, Feldman) 57
Metal voltammetry,
——— at dioleoyl lecithin (di-O-PC) coated mercury electrodes: Cd, Cu, Eu, Pb, V and Zn and the effect of electrolyte composition (Nelson, Van Leeuwen) 183
——— at dioleoyl lecithin (di-O-PC) coated mercury electrodes: effect of organic complexing agents on Cd voltammetry (Nelson, Van Leeuwen) 201
Methyl viologen,
electrochemistry in near-critical and supercritical fluids. Part 8. ———, decamethylferrocene, $Os(bpy)_3^{2+}$ and ferrocene in acetonitrile and the effect of pressure on diffusion coefficients under supercritical conditions (Cabrera, Bard) 147
Microband array electrodes,
direct demonstration of the propagation theory of a conductive zone in a polypyrrole

film by observing temporal and spatial variations of potentials at addressable ——— (Tezuka, Aoki) 161
Molecular effects,
electron and ——— in the double layer for the metal/electrolyte solution interface (Partenskii, Feldman) 57

Nafion,
surface morphology and reactivity of the Pt-SPE electrode. SEM, STM and electrochemical characterization (Uosaki et al.) 275
Use of ——— coatings on glassy carbon electrodes as localized sources of protons for electrogenerated radical anions in acetonitrile (Mubarak, Peters) 283
Near-critical fluids,
electrochemistry in ——— and supercritical fluids. Part 8. Methyl viologen, decamethylferrocene, $Os(bpy)_3^{2+}$ and ferrocene in acetonitrile and the effect of pressure on diffusion coefficients under supercritical conditions (Cabrera, Bard) 147

Organic complexing agents,
metal voltammetry at dioleoyl lecithin (di-O-PC) coated mercury electrodes: effect of ——— on Cd voltammetry (Nelson, Van Leeuwen) 201
Osmium bipyridine ion,
electrochemistry in near-critical and supercritical fluids. Part 8. Methyl viologen, decamethylferrocene, ——— and ferrocene in acetonitrile and the effect of pressure on diffusion coefficients under supercritical conditions (Cabrera, Bard) 147

Permselective coatings,
use of different electropolymerization conditions for controlling the size-exclusive selectivity at polyaniline, polypyrrole and polyphenol films (Wang et al.) 231
Platinum electrode,
voltammetric behaviour of a ——— in concentrated aqueous solutions of LiCl (Tanaka, Tamamushi) 265
Platinum-solid polymer electrolyte electrode,
surface morphology and reactivity of the ———. SEM, STM and electrochemical characterization (Uosaki et al.) 275
Polyaniline films,
use of different electropolymerization conditions for controlling the size-exclusive selectivity at ———, polypyrrole and polyphenol films (Wang et al.) 231
Polyphenol films,
use of different electropolymerization conditions for controlling the size-exclusion selectivity at polyaniline, polypyrrole and ——— (Wang et al.) 231
Polypyrrole film,
direct demonstration of the propagation theory of a conductive zone in a ——— by observing temporal and spatial variatons of potentials at addressable microband array electrodes (Tezuka, Aoki) 161
Use of different electropolymerization conditions for controlling the size-exclusion selectivity at polyaniline, ——— and polyphenol films (Wang et al.) 231
Poly(vinyl chloride),
transport numbers in ——— based membranes from diffusion potential measurements (Armstrong et al.) 209
Propagation theory,
direct demonstration of the ——— of a conductive zone in a polypyrrole film by observing temporal and spatial variations of potentials at addressable microband array electrodes (Tezuka, Aoki) 161
Proton source,
use of Nafion coatings on glassy carbon electrodes as localized sources of protons for electrogenerated radical anions in acetonitrile (Mubarak, Peters) 283

Quartz crystal microbalance,
probing electrocrystallization of charge transfer salts with the ——— (Ward) 79

Radical anions,
use of Nafion coatings on glassy carbon electrodes as localized sources of protons for electrogenerated ——— in acetonitrile (Mubarak, Peters) 283

Selenocyanate complexes,
the electrode processes of ——— of Fe(II) and Co(II) on mercury electrodes (Winkler, Krogulec) 257
Semiconductors,
a re-examination of the mechanism of electrodeposition of CdX and ZnX (X = Se, Te) ——— by the cyclic photovoltammetric technique (Mishra, Rajeshwar) 169

Simultaneous simulation of a set of spectra,
elucidation of electrochemical mechanisms by impedance spectrometry. Part 1. ——— (SSSS) applied to reactions with chemisorbed intermediates (Salié) 1
Size-exclusion selectivity.
use of different electropolymerization conditions for controlling the ——— at polyaniline, polypyrrole and polyphenol films (Wang et al.) 231
Solid polymer electrolyte,
surface morphology and reactivity of the Pt-——— electrode. SEM, STM and electrochemical characterization (Uosaki et al.) 275

Thallium,
electrochemical adsorption and phase formation of TlBr and TlI on Tl(Hg) (Da Silva Pereira et al.) 215
Transport numbers,
——— in PVC based membranes from diffusion potential measurements (Armstrong et al.) 209

Tubular electrodes,
linear sweep voltammetry at ———. Part IV. Catalytic reactions (Dutt et al.) 69

Vanadium,
metal voltammetry at dioleoyl lecithin (di-O-PC) coated mercury electrodes: Cd, Cu, Eu, Pb, ——— and Zn and the effect of electrolyte composition (Nelson, Van Leeuwen) 183

Zinc,
a re-examination of the mechanism of electrodeposition of CdX and ZnX (X = Se, Te) semiconductors by the cyclic photovoltammetric technique (Mishra, Rajeshwar) 169
Metal voltammetry at dioleoyl lecithin (di-O-PC) coated mercury electrodes: Cd, Cu, Eu, Pb, V and ——— and the effect of electrolyte composition (Nelson, Van Leeuwen) 183
